DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II in Paper No. 9 is acknowledged.

Claims 8-12 and 15 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 1121

Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim language "support bonded bisphosphine ligand", "diamine ligand" and "bisphosphine or derivative thereof capable of polymerization" only partially identifies what is contemplated. It cannot be determined what is actually contemplated to be or not to be within the scope of the claims with respect to the unidentified catalysts structures not set forth in the claims. There is no indication of the natural of the linking group contemplated here. There is indication of what functional groups and/or substituents are contained in the ligand groups. Nor is there an indication of what manner the "linking" of claim 14 is carried out. Moreover, the

¹ The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 112 that form the basis for the rejections under this section made in this Office action:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1621

language as to "capable of polymerization" is ambiguous since the linking process does not appear to be a polymerization process.

Claim Rejections - 35 USC § 102²

Claim 13 is rejected under 35 U.S.C. 102(a) as being anticipated by Ohkuma, (Adv. Synth. Catal., Vol 343(4), pp. 369-375 (April, 2001)). Note the catalysts of structure 3.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Michael L. Shippen** whose telephone number is **(703) 308-4635**. The Examiner's normal tour of duty is 7:30 AM to 4:00 PM. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is **(703) 308-1235**. The official group FAX machine number is **(703) 308-4556**.

> MICHAEL L. SHIPPEN PRIMARY EXAMINER ART UNIT 1621

² The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
